HS40AFC & 3100 Compact

The HS40 Compact Gas Purge Compressor and Bubbler System has been designed to replace conventional nitrogen gas bottle supply to bubble units or gas purge systems. The HS40 is used for measuring water level in dams, rivers, canals and tanks with up to 40 mH₂O (130 ft) head.

\$4532

TB7 TBRG

TB7 is a reliable 'low cost' device with a very good accuracy across a broad range of rainfall intensities. The tried and proven design ensures long-term, accurate and repeatable results. It is manufactured from high quality, durable materials ensuring long-term stability in the harshest of environments.

\$260

FCD Portable Field Calibration Device

HyQuest Solutions' Field Calibration Device FCD checks rain gauges in the field for accuracy. The portable lightweight device effectively enables field technicians to run functional tests and verifications of any rain gauge in the field.
